

JAMAICA DEPOSIT INSURANCE CORPORATION

Analyst, Monitoring & Risk Assessment

We are seeking a highly qualified and analytical professional with expertise in Banking, Finance, Economics, Management Studies or Accounting to join the Corporation's Monitoring & Risk Assessment Department. The incumbent will support the Corporation's mandate through financial analysis, risk assessment, research, and monitoring activities aimed at safeguarding the Deposit Insurance Fund and promoting financial system stability.

If you are open to the challenge, feel free to apply! This is a career opportunity for you!

About the Role:

- Collect and maintain financial and operational data relating to member institutions/credit unions and connected companies for monitoring and analysis purposes.
- Assess financial data to identify potential risks and threats to the Deposit Insurance Fund while ensuring compliance with governing legislation and public policy objectives.
- Monitor and analyze developments in the economic, market, and operating environment locally, regionally, and internationally to determine potential impacts on insured institutions and the financial system.
- Participate in resolution and crisis management activities, including the review of resolution plans, simulation exercises, and the execution of resolution strategies.
- Conduct research on financial sector trends, deposit insurance best practices, and developments in other jurisdictions to support policy recommendations and framework enhancements.
- Prepare management reports, briefs, presentations, and analytical assessments to support strategic decision-making and risk monitoring activities.
- Perform qualitative and quantitative analysis of financial institutions to determine their financial condition, risk profile, and overall system stability.
- Contribute to projects and initiatives aimed at strengthening Jamaica's financial system stability and advancing the Corporation's mandate.

Specific Knowledge and Skills:

- **Financial Analysis & Risk Assessment** – Strong ability to analyze financial statements, assess institutional performance, and evaluate risks within the financial sector using qualitative and quantitative techniques.
- **Financial Sector & Regulatory Knowledge** – Sound understanding of financial institutions' operations, accounting practices, and the laws and regulations governing the financial system.
- **Research & Policy Analysis** – Advanced research capabilities with the ability to monitor industry trends, international developments, and deposit insurance best practices to support

policy recommendations and strategic initiatives.

- **Data Management & Reporting** – Proficiency in database management, data collection, and the preparation of detailed reports, briefs, dashboards, and presentations for Management and stakeholders.
- **Crisis Management & Resolution Support** – Knowledge of resolution planning, simulation exercises, and crisis management processes to support institutional readiness and financial system stability initiatives.
- **Stakeholder Engagement & Communication** – Strong written and oral communication skills with the ability to engage effectively with regulators, policyholders, government agencies, and internal stakeholders.
- **Technical & Analytical Skills** – Excellent analytical and problem-solving skills with strong attention to detail and the ability to work independently and within teams.
- **Computer Proficiency** – Proficiency in Microsoft Office Suite including Microsoft Word, Excel, PowerPoint, Project, and Visio.

About the person:

a) Qualifications and Experience:

- First degree or professional qualification in Banking, Finance, Economics, Management Studies, Accounting, or an equivalent qualification.
- A minimum of three (3) years' working experience in banking operations, financial institution regulation, audit, or a related financial sector environment.
- Ability to work with minimal supervision and willingness to work outside normal working hours and travel locally and overseas when required.
